

You are invited to the sixth...

2016 South Sound Science Symposium

Emerging Science on the South Sound Region

Who should attend:

Scientists
Science Users
Educators

What is included:

Presentations
Discussion
Poster Sessions

September 20, 2016, 8am - 4pm
Squaxin Island Tribe's Events Center

91 W. State Route 108
Shelton, WA 98584

Poster Gala to Follow, Featuring Local Seafood!

Purpose of Symposium:

Bring together scientists working in the South Puget Sound ecosystem, including the watersheds that surround the marine waters. What is the emerging science to help inform recovery, restoration, or protection efforts? What are the trends, what is the status, and what does this tell us about the ecosystem condition?

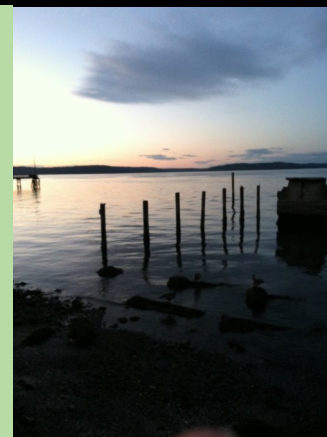

The Symposium will charge a nominal registration fee, and registration will open in July 2016.

For More Information, Contact:

Mindy Roberts (MROB461@eco.wa.gov) or
Scott Steltzner (ssteltzner@squaxin.us)

Potential Topics for Symposium Sessions and Posters:

- 2015 Drought
- The ocean's warm water blob
- Land cover change analysis
- Stormwater remediation
- Early marine survival of salmon
- Forage fish monitoring
- South Sound subsidence & earthquakes
- Sea level rise
